CLINICAL INTELLIGENCE PLATFORM

Complex Cardiac Care + Charts Ready Same Day

CLINICAL INTELLIGENCE FOR CARDIOLOGY PRACTICES:
BEFORE, DURING, AND AFTER EVERY VISIT

THE CHALLENGE

Cardiology Documentation Follows Providers Home

Cardiology documentation runs deep: complex histories, device checks, echo and cath reports to reconcile, and evaluation and management levels that have to be supported by the record. That depth lands after hours, and **the work around the visit follows your cardiologists home**. The chart prep, the orders, the codes, and the follow-ups stay on the provider long after the encounter ends.

Where Most Tools Fall Short

Ambient AI scribes and traditional scribe programs each address part of the cardiology note. Device data, report reconciliation, and evaluation and management support **remain with the cardiologist**.

THE GAP	MOST TOOLS TODAY	SOLUTIONS	THE SCRIBE-X STANDARD
Scope of Work	Draft the visit narrative. Orders, codes, and the after-visit summary remain with the cardiologist.	ASSIST LIVE	The note, orders, codes, and after-visit summary are completed and **ready for the cardiologist to sign**.
Accuracy	Leave echo, cath, and device findings for the cardiologist to verify before signature.	ASSIST LIVE	On Assist and Live, **a trained team member works the note** before it reaches the cardiologist: the Remote Healthcare Assistant on Assist, the Remote Medical Scribe on Live.
Before the Visit	Begin at the encounter. History, prior results, and open orders fall to staff or the cardiologist.	LIVE ADD-ON: ASSIST AND SOLO	Pre-Visit Intelligence prepares the chart and surfaces history, labs, and open orders **before the cardiologist enters the room**.
Provider Fit	Apply one template to every cardiologist, from general cardiology to electrophysiology.	SOLO ASSIST LIVE	Support is **set per provider** and matched to subspecialty, templates, and documentation preferences.
Coverage	Depend on local hiring. Turnover and vacancies return the documentation to the cardiologist.	ASSIST LIVE	Scribe-X recruits, trains, and manages a **remote team** for your cardiologists, with coverage planned for every shift.

THE SOLUTION

One Platform, Set Per Cardiologist

The Scribe-X Clinical Intelligence Platform: **trained people behind the automation, across the whole patient journey.** Most AI scribes stop at the note. Scribe-X completes the work around every cardiology visit, and you choose the level of support for each cardiologist.

SAME DAY
EVERY NOTE READY TO SIGN ON ASSIST AND LIVE, WITH SOLO DRAFTS FINISHED BY YOUR TEAM

99%+
OF SHIFTS COVERED BY QUALIFIED REMOTE MEDICAL SCRIBES AT THE VANCOUVER CLINIC

+3.75
MORE PATIENTS PER PROVIDER, PER DAY, ON AVERAGE AT GOOD SHEPHERD HEALTH CARE SYSTEM

47 MIN
DOCUMENTATION TIME SAVED PER PROVIDER, PER DAY AVERAGE ACROSS ALL PROVIDERS

Solo
ADAPTIVE AUTOMATION

Automation drafts the cardiology note from the visit. Your team reviews and finalizes it, including the study and device detail your cardiologists specify.

MOST POPULAR

Assist
AUTOMATION + HUMAN SUPPORT

Assist completes the work. Automation drafts the cardiology note. A trained Remote Healthcare Assistant finishes it: the note in your chart, the orders, the codes, the after-visit summary. It arrives ready to sign. A second set of eyes on every note.

Live
HIGH-TOUCH, HUMAN

A trained Remote Medical Scribe documents each cardiology encounter in real time. The work is done before the patient leaves. For high-acuity cardiology clinics where documentation cannot slip.

BEFORE THE VISIT
Pre-Visit Intelligence
History, prior results, and open orders are surfaced before the cardiologist walks in. Built into Live, an optional add-on for Assist and Solo.

DURING THE VISIT
Encounter Intelligence
The encounter is captured in your EHR while the cardiologist stays with the patient. Included in every solution.

AFTER THE VISIT
Ready to Sign
The note, the codes, the orders, and the after-visit summary arrive ready for the cardiologist to sign, finished by a trained team member on Assist and Live.

Support is set per cardiologist, in ascending levels of human involvement: Solo where your team keeps the finish in-house, Assist for most cardiologists, Live for the high-acuity clinics that need it. One account, one vendor, and any cardiologist moves when their needs change.
